

To Whom It May Concern,

Pravan has been working at Weta Digital since early 2015, and was one of my best animators on Alvin and the Chipmunks. Pravan was one of the first animators on the team and ended up completing some of the best performance hero shots over the course of the project. He was a joy to work with. Pravan presents himself in a very professional way, and is a consummate perfectionist. I gave him some of the hardest multi character acting shots and the client was always greatly impressed with the quality of his work. He was regularly called out personally by our client at Fox as doing an amazing job. He also worked extremely long hours on the show, sometimes in excess of 100 hour weeks. As this was a show with a very tight deadline, he never complained once. He was always eager to act out his own shots and proved himself quickly to be an excellent performer. Pravan is also a solid technical animator. His personality is extremely easy going, and he always taken his notes with a positive attitude.

I would not hesitate to recommend Pravan for any animation team. He is currently working on BFG, a more trypical creature/mocap driven show at Weta, and I am told by his current supervisor that he is an amazing talent that can do it all.

Please contact me should you have any further questions concerning Pravan.

Kindly,

Aaron Gilman  
Animation Supervisor @ Weta Digital
